CC Docket No.	02-6

Pinon Dormitory would like to request a waiver to waive the FCC 2005 Form 471 deadline of February 18, 2005. Pinon Dormitory missed the deadline due to extenuating circumstances. Pinon Dormitory's Form 471 #482087 was postmarked February 22, 2005.

Pinon Community School is PL 92-638 Contract School on the Navajo Reservation. Our school has been in a crisis since the election of the new school board. There has been a total turn over of the entire school board, with the number of the school board members changing from 6 members to 4 members. The new school board took office on January 5, 2005. There were only two seats filled and the school did not have a quorum for approximately 6 weeks and all official school business was on hold. The old school board had terminated the Executive Director (Principal) and Business Manager before the end of their terms. There was an Acting Executive Director for the months of November 2004 and December 2004. When the new school board came on board, they appointed a new Acting Executive

Director, who is currently in office and has been since the middle of January. With the turn over, projects were on hold; even our payroll was at a stand still, because there were no authorized check signatories. So it took awhile to get even our major projects going. The new administration finally assigned the E-Rate responsibilities to a new person. We were rushed to complete the E-Rate competitive bidding process correctly. We are located 130 miles from the nearest US Post Office. We left our school on February 18th with enough time to drive to the Post Office, but encountered adverse weather conditions and arrived after the Post Office was closed. We truly made our best attempt to get to the Post Office in time.

We present to the FCC—that the school has maintained stability Since the advent of the new administration and is requesting reconsideration of our late submission. We have put processes and personnel in place to avoid any failure to meet the FCC E-Rate deadlines and requirements in the future.
